Xsight

Welcome! From all of us here at Xibitz, we're really excited about bringing this publication to you. We hope you'll find every issue of X-sight not only a satisfying read, but a handy resource for learning more about our projects, people, and plans for the future. Enjoy!

[Best Large Showroom 2004]

[Best of Show 2004]

- IIDA & Contract Magazine

X: on this project:

- Financial project analysis
- On-site & internal project management
- Lightning-fast response time
- Inventive problem solving
- Proof of concept prototyping
- Expert material & fabrication knowledge
- Partnering to meet LEED certification
- Complete turn-key support from concept to installation

Neocon 2004: Home Run for Haworth... and Xibitz!

Haworth's new 23,000 sq. ft. Chicago showroom is a hit! This pilot project in the U.S. Green Building Council's LEED-CI program is a revolutionary space showcasing all Haworth has to offer. Xibitz worked with Perkins & Will and Eva Maddox Branded Interiors to create inventive, flexible, solutions for materials, fabrication and installation methods...all under an extremely tight timeframe. The new showroom was completed by Xibitz in only six weeks, three of which were dedicated to actual install.

The philosophy of sustainability and the showroom's LEED certification allowed for a unique blend of materials, from the Laser cut aluminum wall panels (left) to the wheat board substrates used in all the millwork. In-the-floor interest boxes (center) with walk-on glass floors exposed natural materials as well as products to continue the green message. An acrylic raised floor (right) encompassed a prototype bench for the front "jewel box" window.

“Xibitz was one of the key reasons for our success with this project. Xibitz was very adept at accomplishing our many scope changes, maintaining a highly finished final product, and holding to the ever critical timeline for the conference. Our experience working with your crews and project managers was very positive and will encourage us to seek assistance from Xibitz in future projects.”

- Senior Project Manager,
Haworth
